

Trimline 83 Room Divider

BOTH BEAUTIFUL AND PRACTICAL, THE PERFECT WAY TO DIVIDE YOUR ROOM

Are you looking for a stylish way to separate a spacious room in your house? What about a room divider fireplace? It's a beautiful and practical manner to divide your room and to enjoy the interplay of flames from every side of your room.

The standard version of this fireplace has a burner bed made of wooden logs and is equipped with a double burner. You can also opt for a built-in LED bed to add even more ambiance. The Trimline 83 Room Divider also comes in a tunnel version. On top of that, it comes with the Ecomax remote control and you have the options of adding Wi-Fi-control with our Trimline Fires app.

Product specifications

FEATURES

-  Balanced flue gas fire
-  Room Divider model
-  Woodburner with double burner
-  Ecomax remote control
-  Antracite steel panel interior

OPTIONALS

-  LED glowing fuel bed
-  Black glass interior
-  Grooved interior
-  Anti reflective glass
-  Mains adapter GV60
-  Wall bracket remote control
-  Domotica smart connection
-  Wall switch
-  Wi-Fi remote app control
-  Puck control

Styling & Optionals

Appliance name	Trimline 83 Room Divider			
Appliance type	Balanced flue built-in gas fires (C11, C31, C91)			
Purpose	Ambient heating, real flames			
Engine identification	1184 (RD)			
Gas type-pressure	Natural gas G25.3 – 25 mbar	Natural gas G20 – 20 mbar	Natural gas G25 – 20 mbar	LPG G30/31 – 28-50 mbar
Heat input (kW)	11.8	12.2	10.2	13.9
Heat output max (kW)	9.6	10.2	8.4	11.5
Heat output min (kW)	3.4	3.7	3.7	3.5
Consumption (m ³ /h and kg/h LPG)	1.4	1.3	1.3	0.8
Efficiency (%)	83	83	83	83
Energy label highest efficiency	B	B	B	B
Flue lay out wall termination	Indirect 1m vertical and max 5,5m horizontal / LPG max 3m horizontal			
Weight (kg)	172			
Efficiency class EN613	2			
NOx Class	4			
PIN ID CE	0461CV1116			
Gas connection	3/8" outside connection			
Electrical connection	6 VDC battery powered			
Gas control system	Mertik Maxitrol SYMAX B6R radio controlled 866 mHz			
Safety	Thermocouple flame supervision and pressure hatches			
Heat distribution	Internal convection system			
Connectivity	Optional App control (Android and IOS), wallswitch and domotica connection			
Flue type and diameter	Holetherm-CC concentric flue 130-200mm			
Standard supplied	Adjustable legs – Convection chamber and grills – Wall brackets – Log set			
Optional	Support iron for brickwork chimney breast – Black glass interior – Rilled interior			
Remarks	Always use non-combustible construction materials such as metal stud framing and fireboard cladding			

Installation details

Concentric flue system

Using the THC-CC double wall chimney system the flue gases are safely transported to the outside and fresh combustion-air is pulled inside the appliance. Balanced flue appliances can be installed using a wall terminal so no traditional chimney is needed. THC-CC is made of high quality stainless steel and approved according CE standards in combination with the Trimline appliances.

Balanced flue gas fire

One of the most innovative aspects of the Trimline 83 Room Divider is that there is no need for an existing chimney to be present. This is all down to the clever features of our balanced flue gas fire, that is fully room sealed. Not only does this make for a highly efficient and safe appliance, but when combined with our concentric flue system, our fires can be positioned in virtually any part of your home with a relatively simple 'chimney breast' built around it. A direct wall outlet from the back of the fire makes the installation even easier.
